Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This action is a first Office action on the merits of Application Serial No. 10/769,787, which is a divisional of Application Serial No. 10/231,779 filed on 29 August 2002 now US Patent No. 6,867,114.
2. The preliminary amendment filed on 03 February 2004 cancelled claims 1-9. Accordingly, claims 10-19 are pending.

Specification

3. The disclosure is objected to because of the following informalities: "3 A-E" should be changed to --3A-3E-- (par. 15, line 1; par. 45, line 3 and line 6). Appropriate correction is required.
4. The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application

Art Unit: 2822

designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claim 15 is rejected under 35 U.S.C. 102(e) as being anticipated by anticipated by Campbell et al. (US 6,867,064 B2).

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

The Campbell et al. patent discloses a process, which increases a ratio of silver to a chalcogenide material in a composition of silver chalcogenide material (fig. 1 and accompanying text). The method comprises providing a silver chalcogenide, wherein the silver chalcogenide comprises silver germanium selenide (col. 5, lines 38-55); and removing a selected amount of chalcogenide from the silver chalcogenide (col. 5, lines 56-59 and col. 6, lines 2-6).

Allowable Subject Matter

6. Claims 10-14 are allowable over the prior art of record. The prior art of record does not anticipate, teach or suggest a method for forming memory cells in a PCRAM, wherein the method comprises the combination of steps substantially as claimed.

7. Claims 16-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The prior art of record does not anticipate, teach or suggest removing the selected amount of chalcogenide by implanting oxygen to the silver chalcogenide and annealing the oxygen-implanted silver chalcogenide, as recited in claim 16.
